EDUCATION

Messiah University

Bachelor of Computer Software Engineering

Mechanicsburg, PA

Aug. 2024 – May 2027

EXPERIENCE

Katapult Engineering

SWE Intern

May 2026 – August 2026

Dillsburg, PA

- Owned server setup and migration work for client environments from start to finish, provisioning and configuring resources on Google Cloud Platform and building a repeatable workflow the development team continued using.
- Built and integrated REST APIs to connect client facing features to backend services, and used Firebase for data storage and authentication on select projects.
- Reviewed pull requests and gave code review feedback across the team, catching bugs before release and keeping the codebase consistent with team standards.
- Managed the team's billable backlog independently during a stretch with more priorities than people, keeping priority deliverables on schedule for utility clients OG&E and PPL.

Katapult Engineering

SWE Intern

May 2025 – August 2025

Dillsburg, PA

- Developed an API resources widget to simplify extensibility tools for clients, including example API calls and an interactive UI for running or copying code with real dynamic output.
- Designed and implemented embedded integration windows with modern, stylized UI components to improve usability.
- Resolved critical software bugs, removing barriers that impacted client workflows and enhancing overall product reliability.
- Collaborated in weekly Scrum cycles, strengthening skills in agile development, teamwork, and project ownership.

Google

CSSI GOOGLE Intern

June 2022 – August 2022

Remote

- Collaborated with Google Engineering teams on weekly Sprint projects primarily utilizing JS frameworks with NodeJS.
- Utilized Firebase protocols for back-end end & user authentication management leading to improved code-base management and review.
- Partnered with CSSI Interns on end-of-term MVP projects

All Star Code

Front End Development

June 2021 – August 2021

New York, NY

- Bootcamp that fostered skills in JavaScript, HTML, and CSS
- Ended with a collaborative project utilizing APIs and Firebase

PROJECTS

Roots | JavaScript, HTML, CSS

2023

- Developed a web application for an all-in-one hiking tool
- Utilized weather API for a weather feature
- Implemented appealing visuals and parallax scrolling

MoundhalaVerse | JavaScript, HTML, CSS

2024

- Developed an interactive personal portfolio
- Links to all my projects
- Implemented a multitude of UX accommodations including settings and modality

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, HTML/CSS, SQL, French

Developer Tools: Git, Google Cloud Platform, VS Code, Visual Studio, Firebase, Supabase

Relevant Courses: Data Structures, Algorithms, Machine Learning, Statistics & Discrete Math, Database Concepts
